## ELECTRICAL ESTIMATOR - ENGINEERING SERVICES

To prepare accurate nett estimate of project cost and following settlement process, manage the submission of agreed tender offer to the client, typically on traditional & non-traditional forms of procurement

Uphold and communicate the values and culture of the Seddon brand and position Seddon as the contractor of choice

### What you'll do

- Developing competitive design solutions to client's briefs with input from the professional team and subcontractors
- Adopting a proactive approach to value engineering throughout the design phase of design and build projects
- Regularly visit sites when required
- Compiling accurate budget cost & cost plans using appropriate data including company historical data.
- Managing the subcontract and material enquiry process
- Initiating technical queries and ensuring design is sufficiently developed to indicate accurate costing
- Pricing of rates from first principles
- Convening and chairing a Tender Launch meeting
- Attending internal mid bid review meetings as required
- Highlighting and discussing major commercial issues with the Bid Team, as well as preparing the Contractor's Proposals for design and build projects
- Preparing and submitting tender documentation

### Have you got what it takes?

- Successful delivery of tenders on a wide range of tenders
- Have experience of various construction methods
- Good communications skills
- Knowledge of Supply Chain management
- Experience of controlling costs, timing and quality in line with targets
- Experience of reading and accurately interpreting drawings and technical specifications
- Good standard of mathematical ability
